

**REMARKS:**

At the time of the Office Action, claims 1, 5-19 and 21 were pending and rejected.

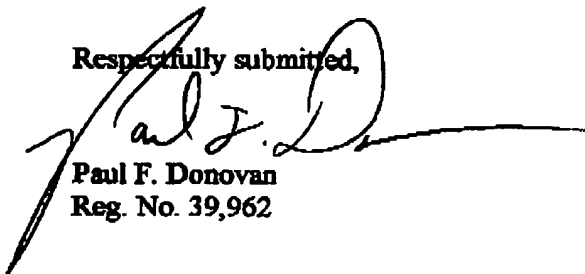

A telephone interview between the undersigned and the Examiner was held on July 29, 2005. The claims as submitted with Amendment A were discussed in view of the rejections made in the Final Office Action. After further discussion and in view of the arguments presented, the Examiner indicated the claims appeared to be in condition for allowance. However, the Examiner objected to Fig. 4 indicating additional cross-hatching is needed to better illustrate the aperture 88. Accordingly, submitted herewith is a replacement sheet for Fig. 4 to address the Examiner's concerns. Removal of the objection is respectfully requested.

Incidentally, although formal drawings were submitted and received by the patent office on April 19, 2004, the formal drawings are resubmitted with this Amendment for the Examiner's convenience.

Reconsideration and allowance of all the pending claims is respectfully requested. In the event that there are any remaining issues that can be addressed and dealt with expeditiously by telephone conference, the Examiner is invited to telephone the undersigned at the number indicated below.
